

Steve Scott's Layout

have a dedicated room in my basement so I'm able to leave it up all year. About every inch of space is used up and my last expansion included running a small oval in the ceiling. A number of years ago I purchased the Ferris Wheel from one of the club members (name slips my mind) that used to build them and bring to the shows. He unfortunately passed several years ago but this one of the highlights that brings back many memories among others.
